

GATORSTITCH™

A STEEL STITCH™ STAPLE-IN FRAMING SYSTEM

 **allied**
TUBE & CONDUIT

**Featuring Gatorshield®
Galvanized Steel Tubing**

Advantages

of Gatorstitch™ Stapling System

- Covers are wrinkle-free & drum-tight.
- Reduces labor costs: Fastest covering method known.
- Works with any awning or flex-face sign fabric: woven acrylics, laminated and coated vinyls, polyester blends, open mesh weaves, etc.
- Shorter learning curve: Learn to cover the basic stuff in just days; become a pro at covering even the most difficult structures in a few months.
- Reduces fabric wear resulting from increased fabric-to-frame attachment points.
- More complete transfer of uplift wind loads through increased fabric-to-frame attachment points.
- Damaged panels can be replaced individually – on location – saving repair costs and unsightly downtime.
- Allows in-shop quality inspection of installed fabric covers.
- No attachment laces to show underneath awning.
- Frames can be recovered multiple times.
